Organic Produce

We have the privilege of ordering some beautiful produce from Brendan a local organic farmer in Goomboorian at wholesale prices and we have been placing orders fortnightly to coincide with the meeting on the Sunday

**I'd like to thank Jenece for taking over the veggie order
So please direct all your orders to Jenece from now on
Thank you Jenece**

All orders taken fortnightly and close on Thursday at 5 pm

Reminders will be posted on Facebook or Telegram

**The next order will be placed today the 7th of November then
fortnightly after that until available**

As the season changes availability of produce changes

This week we had available

Sweet potato \$3.50/kg
Lebanese Cucumber \$6/kg
Zucchini \$6/kg
Green Beans \$10/kg
Cos lettuce \$3 each
Snow pea \$20/kg
Ginger \$15/kg
Cherry tomato \$3.50/punnet

Thank you

Signature Sourdough

Organic Sourdough and Spelt Bread

Due to Jame's personal circumstances the bread order has been put on hold until further notice

Thank you

We are endeavouring to add more local farmers and producers to our food source list.

If you would like to recommend a farmer, a producer of goodies please email us

Thank you

Grahams Tech talk

Hi folks,

On almost all websites these days they ask you to agree to the "terms of service",

which most of us do not read because they are mostly framed in legalese and are hard to glean the important information that might affect you.

Today, I want to talk about a browser plugin that helps you decide whether the terms of service are acceptable to you. The project is called "[Terms of Service; Didn't Read](#)" (short: ToS;DR) which began mid 2012 in Germany by people from a movement to create web apps that give users control over their valuable user data and privacy.

What does "ToS;DR" mean? the name is inspired by internet acronym TL;DR - which stands for "Too Long; Didn't Read" and is often used on blogs and emails to signify that the following paragraph or two is a summary when a block of text is really long and many people are too lazy to read the whole stuff.

The ToS;DR service has plugin downloads for these browsers:- Firefox, Google Chrome (or open source Chromium), Apple's Safari, Microsoft Edge, and Opera. These can be found at <https://tosdr.org/en/downloads>.

What happens when you are browsing to a site (say Facebook), the plugin puts an icon in your browser with an rating from A to E and also can open a new tab with the summary page of the things that you might not like about Facebook (for example). See <https://tosdr.org/en/service/182> for the facebook info.

You can learn quite a lot about the site by scanning down the list of issues and each one has a link to see the details about that potential problem.

You can also just use the search function on their website to find the info without installing a plugin into you browser, but I think that most people will forget to take the extra steps of opening a new tab in their browser program and searching for the site they are about to join and agree to their terms of service.

Go to <https://tosdr.org/en/frontpage#ratings> to see a bunch of the big sites.

That's all for this edition.

Hooroo, Graham

MYTHS AND FACTS ABOUT GROWING SWEETER TOMATOES

There are hundreds of varieties of tomatoes and some are genetically sweeter than others so that is the easiest way but there are some processes to help sweeten and many old wives tales that simply don't work.

MYTHS

Basil is an excellent companion plant but it's chemically impossible to change the flavour of its neighbours. It's believed that basil and tomatoes are such fabulous eating partners that the smell of basil invokes a feeling that tricks the senses into believing the tomato is sweeter.

Epsom salt (magnesium sulphate) added to soil. It is a plant nutrient which works with nitrogen to promote stronger and greener leaves which might have a minuscule effect but highly unlikely to sweeten tomato.

Sugar applied to soil at time of planting. In a nutshell, it's impossible as refined sugar and natural occurring sugars are totally different and plant roots cannot absorb table sugar.

FACTS

More sunlight and higher temperatures will sweeten the fruit by photosynthesis of the leaves which creates natural sugars and once leaves have used what they need, the added sugars are stored in the fruit (a bit like our fat cells). Of course, temperature is something we can't control but if you grow in pots, they can be moved to a more sunnier spot. Ideal temperature is around 30° but too hot will cause flowers to fall.

Reduce water by about half once fruit starts ripening which stresses the plant and it creates more sugar. This definitely creates sweeter tomatoes but keep soil at consistent moisture and don't let it dry out.

Enjoy your tomatoes and please feel free to ask any questions.

Thank you
Happy gardening

Lets talk Weeds

Plantain

A Medieval Marvel

Plantain (*Plantago lanceolata*) is usually considered “only a weed”, as it is found growing in gardens, lawns, paddocks and along roadsides, all over the world. However, plantain is actually a very old herb whose healing powers are mentioned in literary references from Chaucers’ days (1343-1400) onwards.

Shakespeare speaks of ‘plantain leaf’, in Romeo and Juliet, as excellent for a ‘broken shin’; Greek and Roman physicians used it medicinally and English herbalist Culpeper recommended it for its healing properties. Swiss herbalist, Johann Künzle wrote: *“Like no other herb it cleanses the blood, the lungs and the stomach and is therefore valuable to those people who have little or bad blood, weak lungs and kidneys, pale looks, eczema and who are hoarse and plagued with coughs.”*

Plantain has an antibacterial action, is a gentle expectorant and soothes mucous membranes, making it beneficial for many respiratory conditions, including coughs, bronchitis, whooping cough and asthma. A strong tea made of the leaves is extremely beneficial for diarrhoea, haemorrhoids, cystitis and bleeding, as well as kidney and bladder disorders. The tea is also said to discourage smoking, if sipped and held in the mouth.

Externally, plantain has a soothing, cooling and healing effect. It is included in many ancient recipes for ointments and the fresh, bruised leaves can be used in poultices applied to cuts, scratches, sores, ulcers, wounds, insect stings, dog and snake bites.

The leaves are also recommended for thrombosis and malignant growths, and when placed inside your shoes, they can keep the feet free from blisters on long walks.

Great for the chickens

Thank you

**And enjoy this wonderful weed of Gods creation for our use
